THE FIRST FIVE MINUTES / REIMAGINED

COREX

Make your first workout feel like progress.

A value-first redesign of AbMaxx: from the first goal selection to a real guided workout and a transparent subscription choice.

ABMAXX → COREX

VERTICAL SLICE PROJECT · OCT 2026

Not a full app. A working reason to believe.

The brief asks us to rebuild one complete first-run journey — polished enough to demonstrate on a real phone.

01	02	03	04	05	06
PROMISE	**GOAL**	**PROFILE**	**YOUR PLAN**	**AHA MOMENT**	**PAYWALL**
A clear outcome	Why you are here	Only useful inputs	Reflect answers	Perform the action	Pay after value

What matters most: A stranger can launch, personalize, complete a workout and reach the paywall without guidance.

Source: Vertical Slice Project Brief, pp. 1–3, 9–11.

A niche app with proven demand.

PROVIDER-VERIFIED REVENUE

$50.5K

Revenue earned over a 30-day period shown on TrustMRR (snapshot updated Oct 7, 2026).

RECURRING RUN RATE

$18.7K

Monthly recurring revenue in the same snapshot. Different metric from total 30-day revenue.

PRODUCT CATEGORY

FITNESS

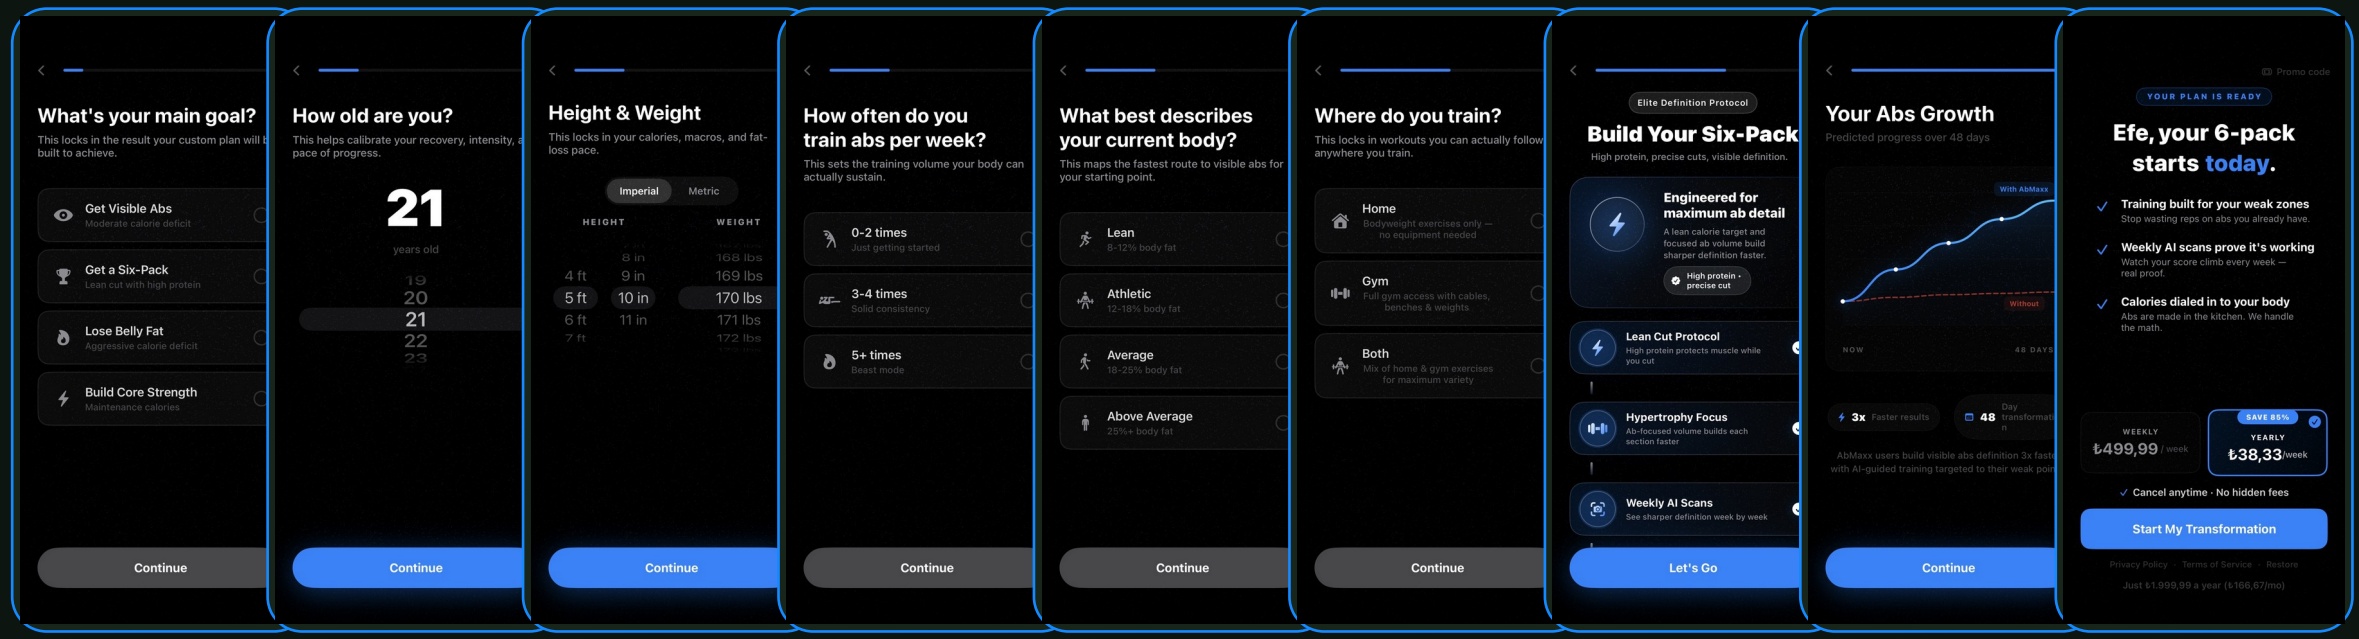

AI-assisted abs plans, coaching and paid subscriptions — ideal for a first-session redesign.

WHY IT QUALIFIES

The course target is ~$30K–$100K monthly revenue. AbMaxx fits on a 30-day revenue basis.

Source: TrustMRR / AbMaxx, RevenueCat-verified, Oct 7 2026; https://trustmrr.com/startup/abmaxx. 30-day revenue ≠ MRR.

Inside AbMaxx: a long sales-oriented first run.

GOAL | AGE | BODY | FREQUENCY | PHYSIQUE | LOCATION | PLAN | PROGRESS | PAYWALL

OBSERVATION

Many inputs and prediction claims appear before the paid decision; a first workout is not visible in these supplied onboarding screenshots.

Source: 9 selected AbMaxx screenshots from the 10 images supplied by the student (22 Oct 2026); observation limited to captured screens.

More coaching. Less guesswork.

FOR

Busy beginners who want a stronger core without a confusing plan.

PAIN

Too much reading before doing.

PROMISE

Try a guided core workout in minutes.

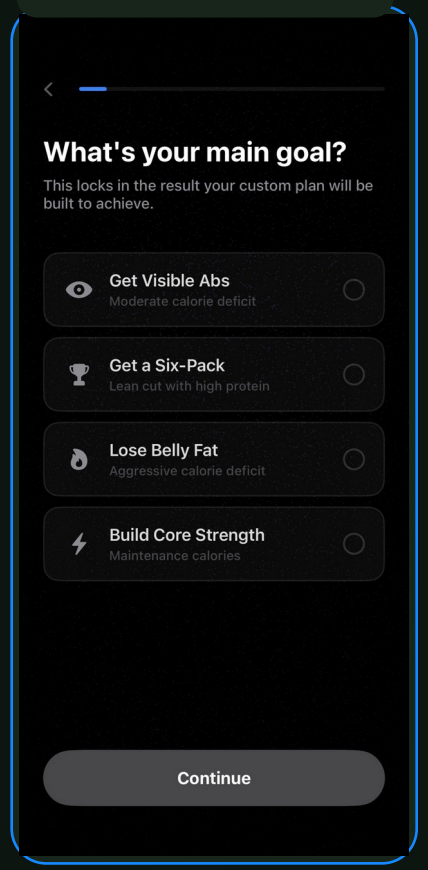

DIFFERENTIATOR

No account or payment before the first workout.

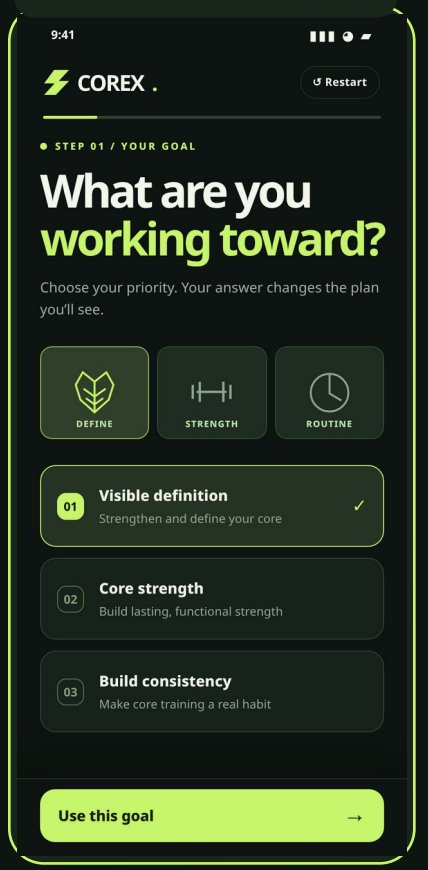

Value proof = a real timed set, realistic exercise visuals and an honest post-workout paywall.

01 / Say the goal. Show what changes.

ORIGINAL / ABMAXX

REDESIGN / COREX

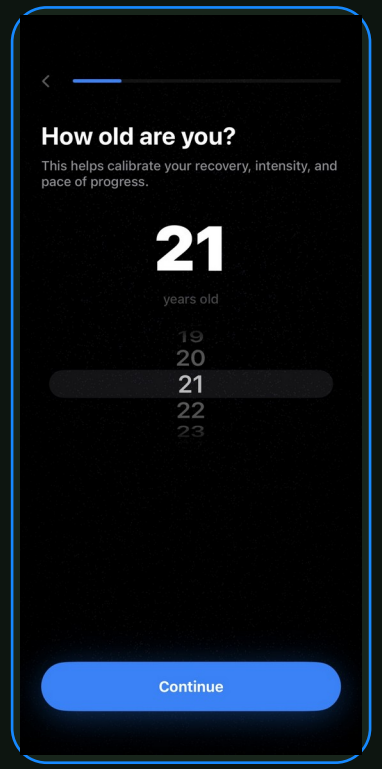

Less choice overload.

- AbMaxx: four goal categories, with calorie-focused descriptions.
- COREX: three clearly grouped core-training intentions.
- Selected goal changes language on the plan and home screens.

Designed improvement: a simpler decision with a visible later effect.

Visuals: original AbMaxx screenshot (student-supplied); COREX v3 screenshot (captured from prototype).

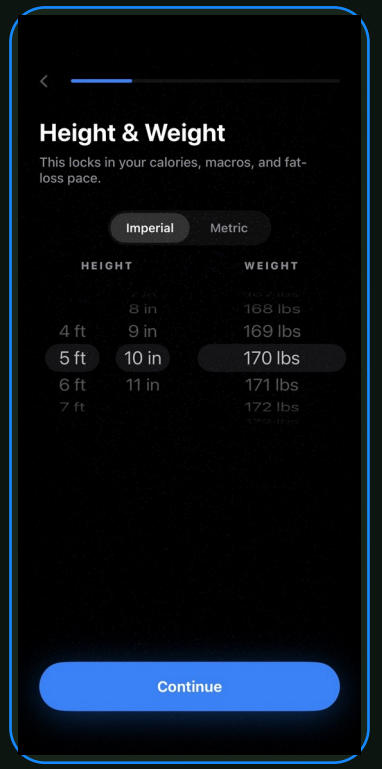

02 / Personal, not unnecessarily complicated.

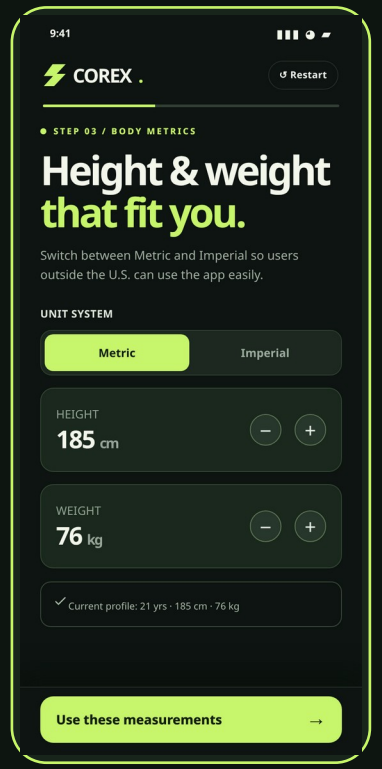

ABMAXX / AGE

COREX / AGE

ABMAXX / MEASURES

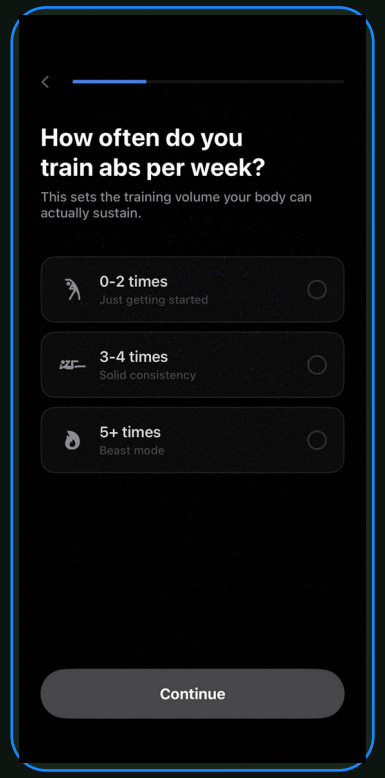

COREX / MEASURES

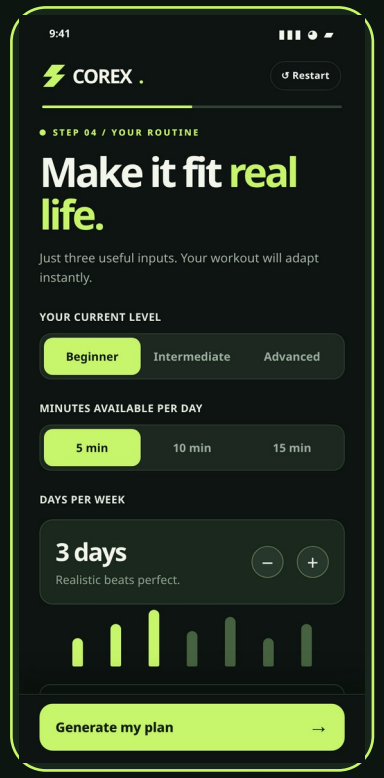

Both apps offer Metric and Imperial measurements. COREX uses Metric by default and reflects age, height and weight in the personal-plan summary.

Source: student-supplied AbMaxx screenshots, 22 Oct 2026. COREX metric defaults shown in v3.

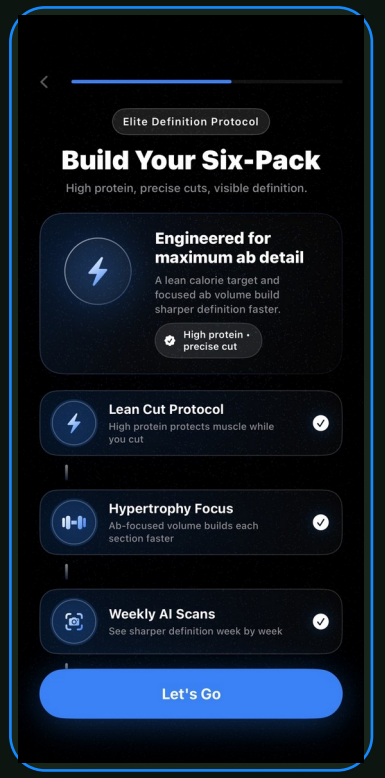

03 / Every answer has to earn its place.

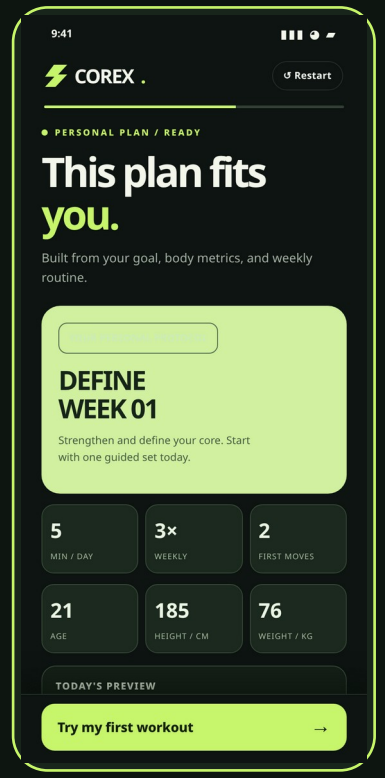

ABMAXX / FREQUENCY

COREX / ROUTINE

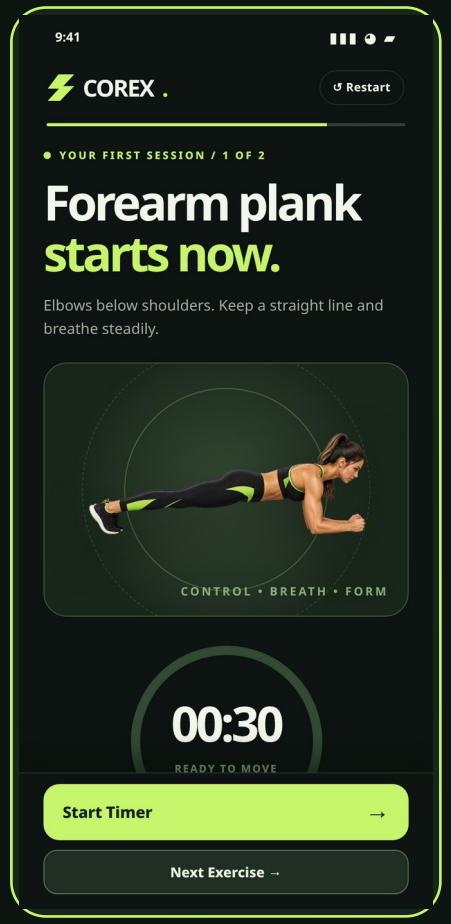

ABMAXX / PLAN

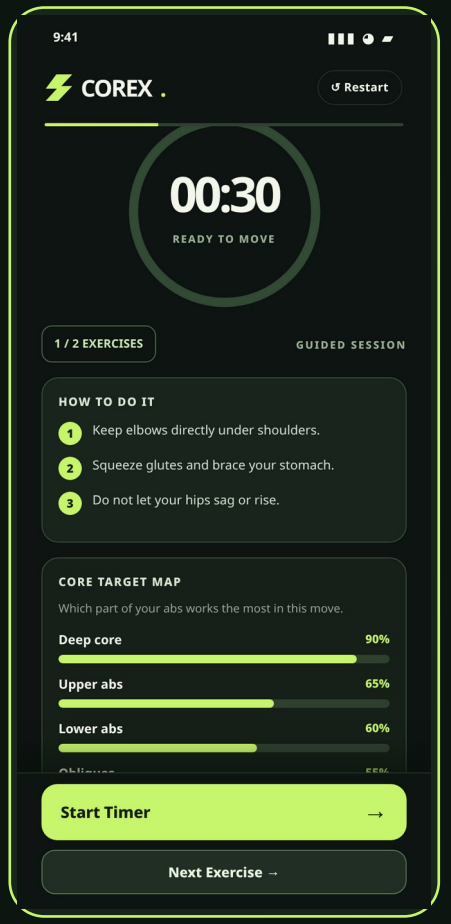

COREX / PLAN

COREX rule-based personalization: goal + level + age/body metrics + schedule → visible first-week plan and exercise choice.

04 / The product becomes real here.

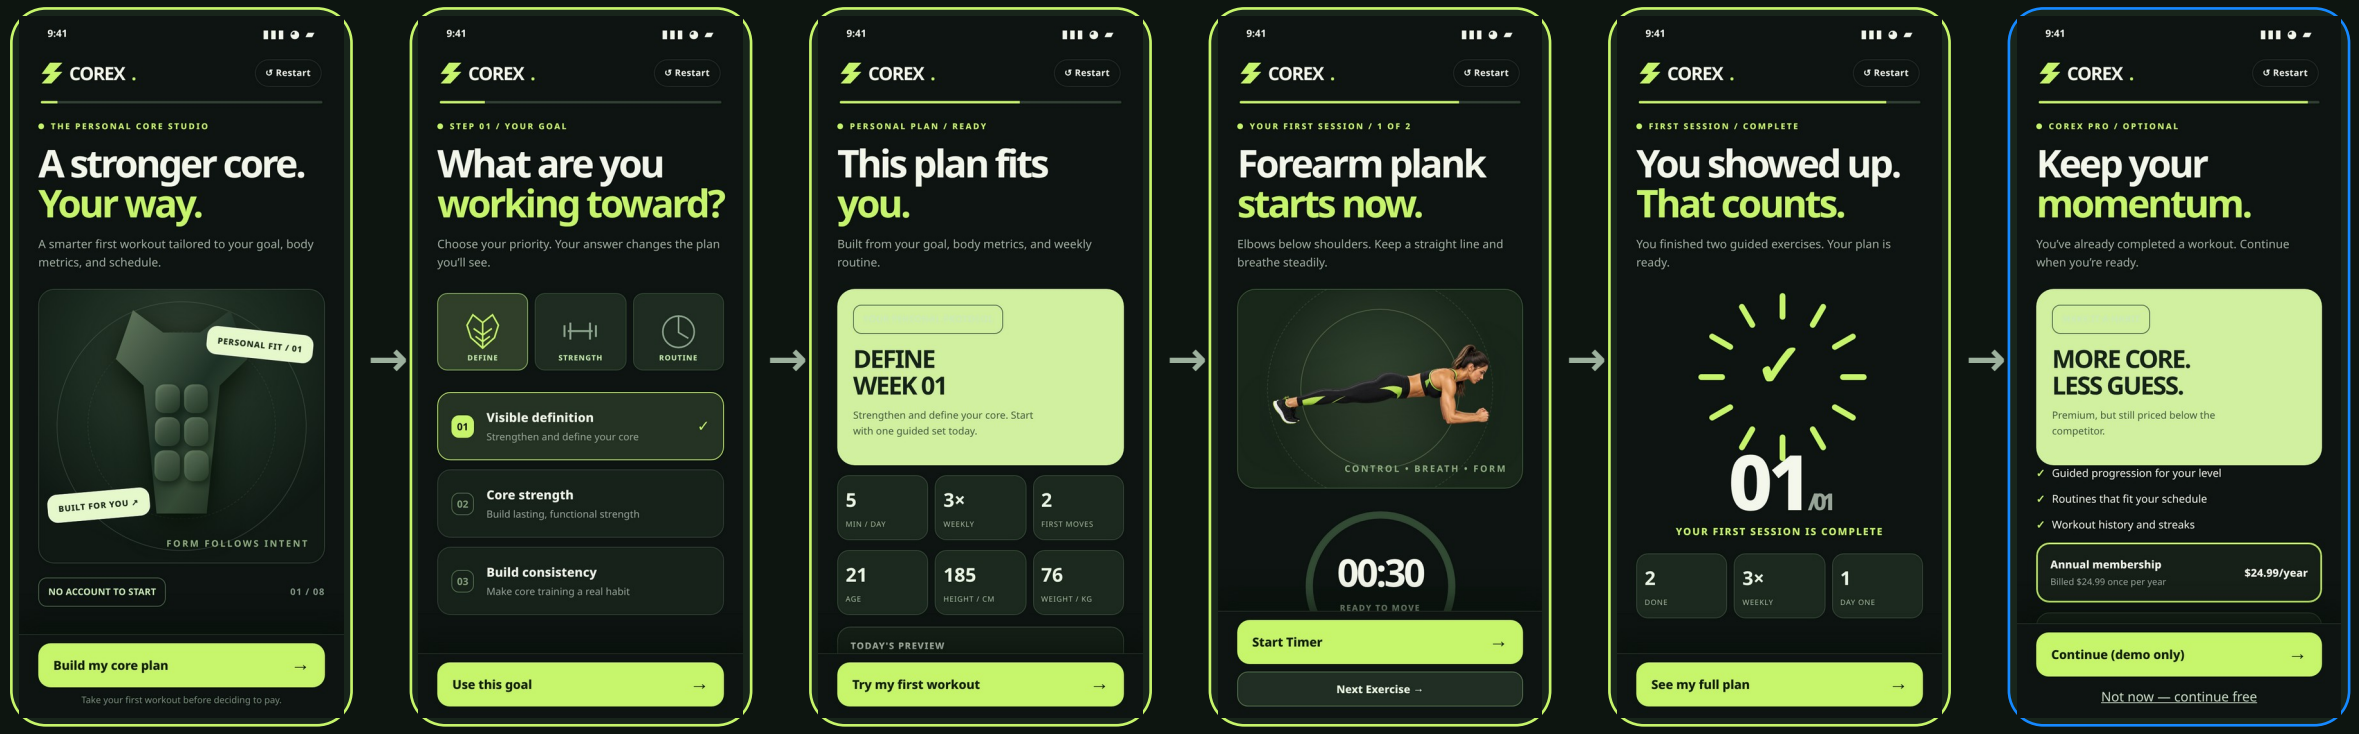

ONE WORKOUT. REAL FEEDBACK.

- Working pause / resume timer.
- Movement-specific realistic imagery.
- Three-step form guidance for each move.
- Indicative core-target visualization.

Targets are educational estimates, not measured muscle-activation data.

05 / Let the user feel value before the ask.

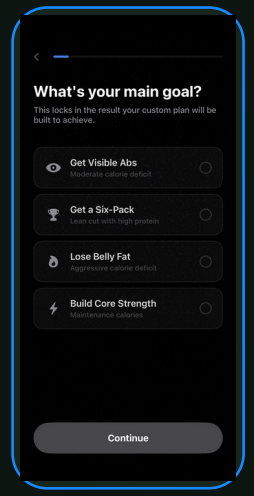

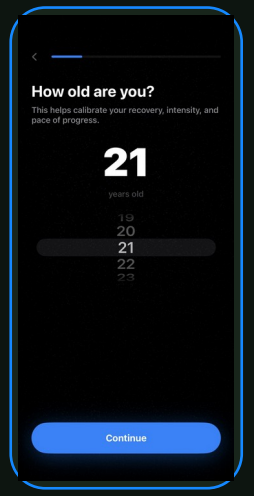

01 / PROMISE → 02 / GOAL → 03 / PLAN → 04 / DO IT → 05 / ACHIEVE → 06 / PAYWALL

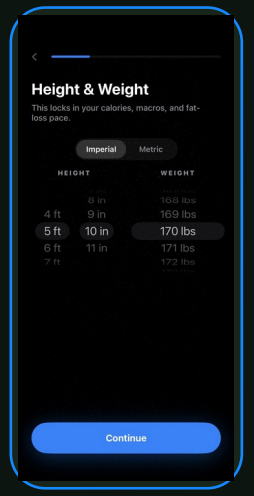

No server, account, AI API or real billing is required to demonstrate this end-to-end journey.

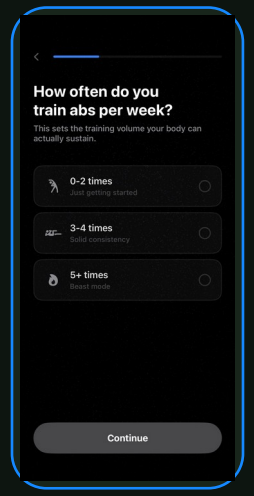

Competitor on top. COREX underneath.

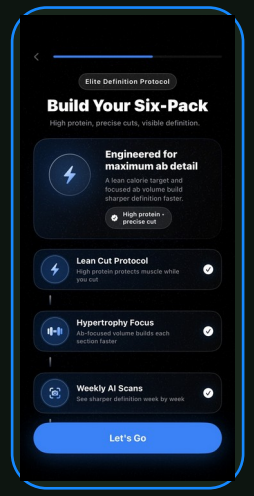

ABMAXX

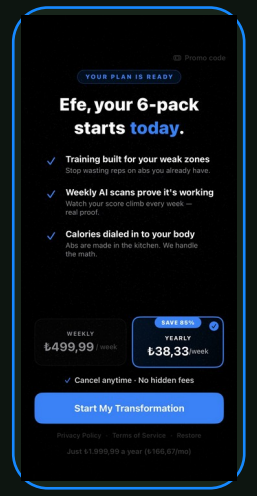

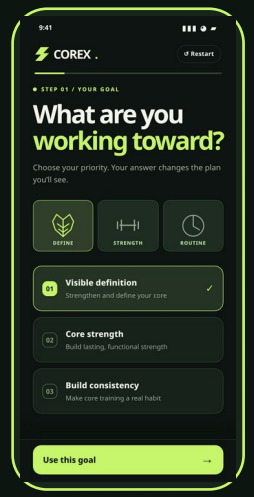

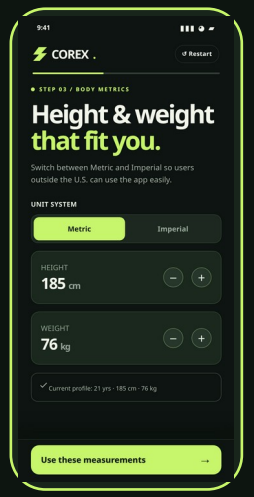

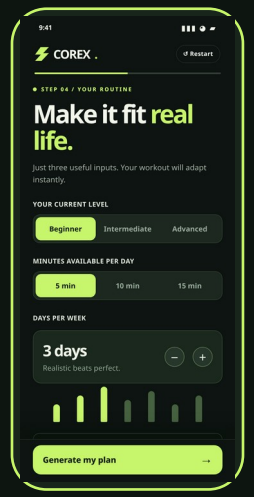

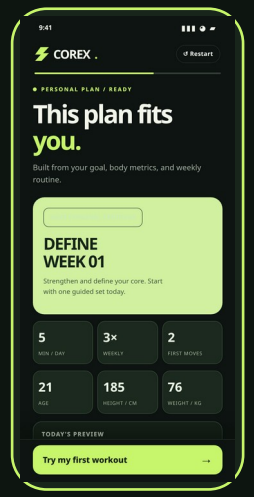

COREX

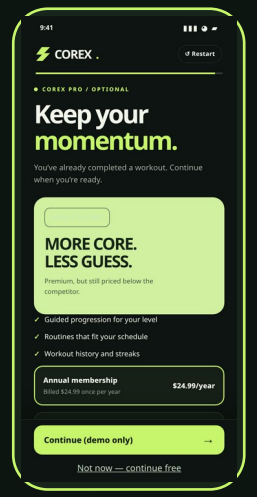

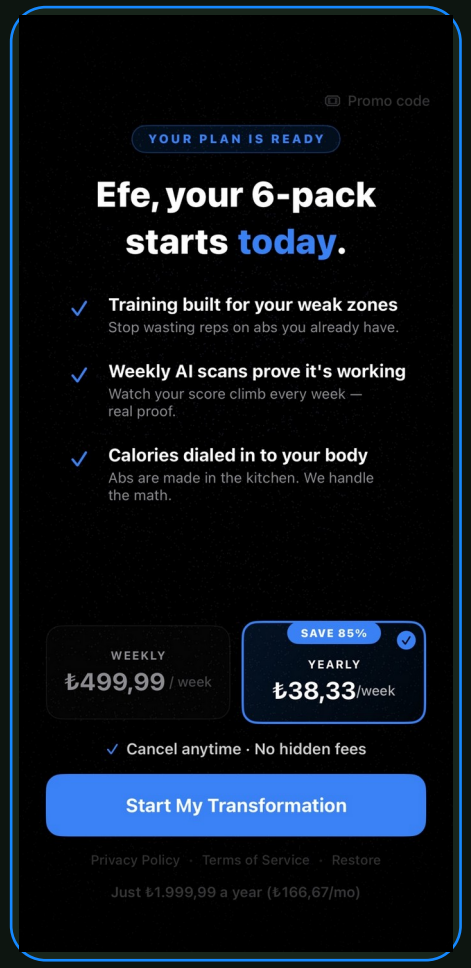

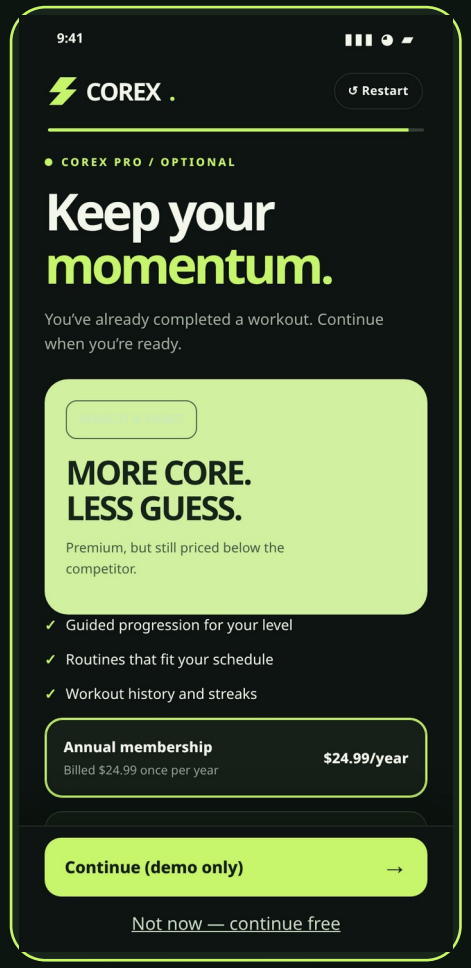

GOAL | AGE | BODY METRICS | FREQUENCY | PLAN | PAYWALL

06 / Sell the continuation, not the promise.

ABMAXX

COREX

COREX SHOWS

$24.99

per year / prototype price

$4.99

per week / prototype price

- Shown after workout completion.
- Free continuation remains available.
- No real payment or automatic renewal.

AbMaxx screenshot prices are in TRY; COREX prototype prices are in USD. This is not a currency-normalized affordability comparison.

What works. What is intentionally simulated.

WORKING

Goal & input selection

Age, height, weight, routine

WORKING

Guided first exercise

Timer, pause, next, completion

WORKING

State & progress

Saved inputs, progress indicators

SIMULATED

Premium checkout

Selectable demo paywall; no charge

SIMULATED

Personal training AI

Rule-based plan and fixed mock data

OUT OF SCOPE

Backend or user accounts

Not needed for this vertical slice

TOOLS: Figma-style screen design • HTML/CSS/JavaScript web demo • Expo/React Native mobile source • local storage • generated workout illustrations

Scope mapped to Vertical Slice Project Brief, p. 9; front-end source: COREX Studio v3.

We can defend these improvements — without fake data.

SUPPORTED NOW

OBSERVED

AbMaxx prompts for goal, body data, training habits and location in the supplied screenshots.

BUILT

COREX connects inputs to a plan and a guided first set before the paywall.

DESIGNED

In COREX, pricing and the free path are easy to find.

NEXT TO VALIDATE

NOT YET MEASURED

Time-to-value difference versus AbMaxx.

NOT YET TESTED

First-screen understanding with five classmates.

NOT YET COMPLETED

30+ low-star review audit and real-phone cold-run evaluation.

Decision: do not invent user-test results or treat competitor marketing graphs as proven outcomes.

LIVE DEMO

Demo day: show, don’t just tell.

01 START

Promise in 10 words or less

02 PERSONALIZE

Goal, age, Metric / Imperial, routine

03 SEE THE PLAN

Inputs appear in week one

04 DO THE WORK

Timer + form guide + target map

05 FEEL PROGRESS

Complete first set

06 CHOOSE

Transparent paywall or continue free

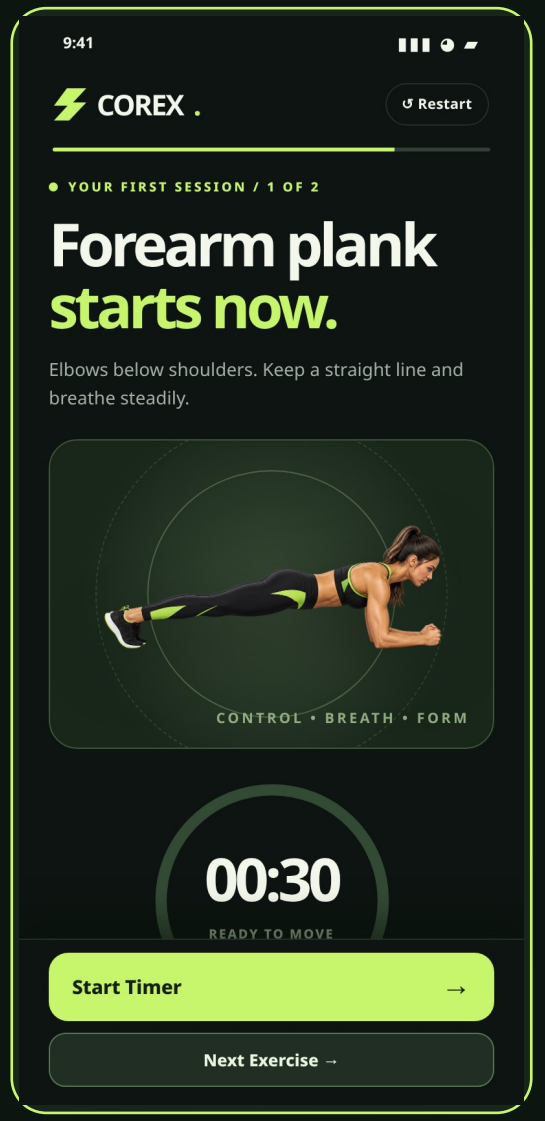

ONE QUESTION TO END ON

“Would you understand, trust and try COREX after its first five minutes?”

COREX.

A first session that earns the ask.

Designed to be understood.
Built to be experienced.
Ready to be tested.

SOURCES / PROJECT CONTEXT

Course brief: Vertical Slice Project Brief (11 pages). Competitor screenshots: student-supplied, Oct 22 2026. AbMaxx revenue: TrustMRR, RevenueCat-verified snapshot Oct 7 2026. COREX images: captured from prototype v3.
